10. Mandatory Ethical Governance & Academic PoC Disclosures

- 1. Non-Punitive Attribution:** Machine attribution represents probabilistic correlation of system telemetry and does not establish legal intent or disciplinary fault.
- 2. Telemetry Limits:** Network and device identifiers are supporting evidence only and do not constitute independent identity verification.
- 3. Mandatory Escalation:** All ambiguous or unverified clinical actions mandate independent investigation by authorized hospital compliance personnel.
- 4. Synthetic Data:** All clinician identities, shared accounts, and logs in this dossier are deterministically simulated. No real patient PII is present.
- 5. Regulatory Scope:** This academic prototype is not certified under HIPAA Security Rule (45 CFR § 164.312), FDA 21 CFR Part 11, or ISO 27001 standards.
